

To our Customers,

The current situation with COVID-19 is changing rapidly, and state authorities are responding to changes and recommendations daily. Lindsay's continue to be vigilant to these changes and adapting to ensure we remain operational.

In addition to our extensive cleaning and sanitising regime across all our Site offices, common areas and company vehicles, we are now fogging/sanitising employees personal cars as another layer of protection for our staff and families.

We are providing onsite voluntary COVID testing at our Major city sites. We are working closely with local company doctors to aid our drivers with referrals for seven-day testing to meet border crossing requirements.

The organisation is closely monitoring individual state-based border crossing requirements around the clock and ensuring we meet these to continue to provide essential services Australia wide.

Lindsay Australia is committed to the health & safety of our employees, customers and partners,

Thank you for your commitment, stay safe and let's continue to work together.

Keep Safe,
Kim Lindsay
CEO
